

Versatile Time & Information Displays

An easily programmable time and Information display that enables you to promote products and events. Utilises a high quality flat screen that is programmed to change every few minutes displaying new information.

The Information Screen utilises a pre-designed template which enables the user to program dates and events ahead of time and activate at a selected time and date. You can insert your own graphics and logos, or have your logo behind the clockface, constantly in view.

Uses include:

Reception area

Providing your business with a high profile image at the point of entry, informing your clients of the time and up-coming events or marketing information.

Point of sale

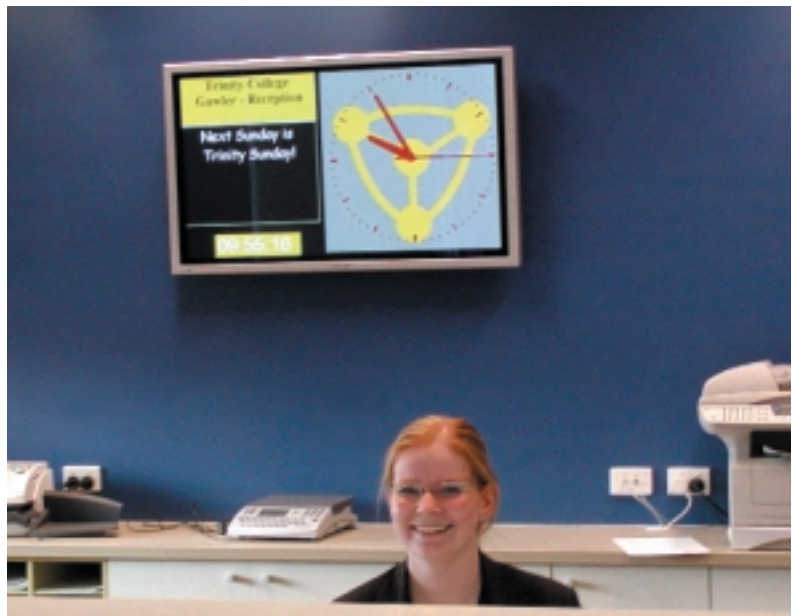

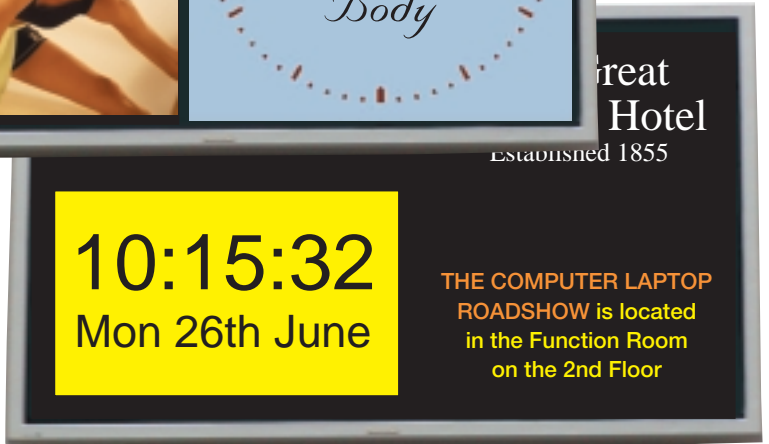

The display can offer moving or fixed text with images at the same time. We offer a range of programs to suit most needs or we can write a program to suit your needs.

Education / Conference Room

Unlike the over-head projector the room does not need to be dark to display a good image, allowing notes to be taken at the same time. This information screen is the perfect solution in class rooms, lecture halls and conference rooms.

Hospitality

For hotel and conference centres. The display is designed to inform and advise on new events with time, dates and directions. The sign also allows you to display upcoming events, photos and advertising information.

Showcase people, events, products or special offers
