PO Box 220, Semaphore SA 5019

ClockMasters Australia has moved premises

ClockMasters Australia have moved to *17 Howards Road Beverley SA.*

We can still be contacted on the 1300 555 099 toll free number or 82688501.
The email address has remained the same.

The larger office and workshop is to accommodate the expansion in work.

ClockMasters are now manufacturing LED indoor and outdoor clocks and information displays. We are making the information displays to suit the needs and operating requirements of the individual client.

With our new electronic engineer we offer inhouse and onsite repairs to all LED displays. If you have requirements for clock systems or LED or plasma displays please fill free to call in or arrange for Graham to come and discuss your needs.

Keeping the time on the game

ClockMasters Australia have just finish the upgrade with a new count-up timer clock at the Port Adelaide Football Club (Alberton Oval).

The LED count up clock has a 600mm high display giving a 200 metre viewing distance with a polycarbonate cover to protect it from vandals. The easy to use controller has start, hold, stop and reset. The hold button on the clock allows for the time on the clock to be held and then start the count up or down from the time showing on the clock.

ClockMasters use red 1600 mcd/led's lamps for brightness in full sun. The clock offers a 90/' viewing angle.

All clocks come with a two year warranty. ClockMasters can also supply full led scoreboards designed to the requirements of the user. For enquires please phone Graham on 1300 555 099 or email on clocks@clockmasters.com.au.

ClockMasters have upgraded our website—check it out today at www.clockmasters.com.au

New LED clocks at Hilton

ClockMasters has just replaced the signs and clocks on the corner of South Road and Sir Donald Bradman drive at Hilton, SA.

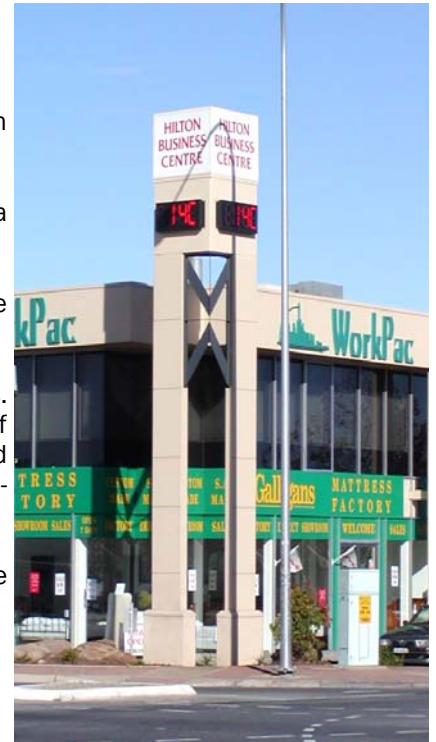

Our own ClockMasters brand was used - the 400mm LED outdoor clocks offer a full hands free operation. The time is set and adjusted using GPS technology.

The clocks offer a range of options in the set-up including time and temperature display or time only.

The display for the time and temperature can be set to the client requirements. An option of a date display is also available. The clocks have a viewing angle of 45/90°. They back up with automatic reset to time after power black outs and offer automatic LED light dimming for day and night display. There is easy opening of the case for servicing.

We have a standard range from 200mm to 600mm display heights. We are able to make special orders of larger sizes if required.

All clocks have a two year warranty.

New staff member at ClockMasters

Harry Ng has joined the team at ClockMasters as an electronic engineer with previous experience in the development of RF network systems.

He has obtained his Bachelor of Electrical and Mechatronic Engineering with Honours from the University of South Australia.

Harry has previously worked for Lemtronics assisting in the establishment of RF network test systems.

He speaks and writes fluently in English, Mandarin, Malay & Hokkien as well as has a competent understanding of Cantonese.

Harry joined us in February and has brought a new edge to the services offered by ClockMasters Australia.

Welcome to the team Harry!
