

Eco Indoor Clocks

»ECO secondary clocks are elegant and fit in with any surroundings

Time is money. With our ECO models, you get a lot of time for very little money.. They can be quickly put into operation as independent battery-operated quartz clocks or radio-controlled wall clocks. ECO clocks can also be used in a self-setting MOBALINE clock installation. If you simply want to install a conventional one minute pulse time system at low cost, there's no problem. ECO secondary clocks can be installed in various ways and are built to high professional standard. Why not your next choice?«

Order Example ECO.A.40.210

Order Reference ECO.movement.dimension.dial
