The clock that changes it's look at night

Clockmasters were commissioned to design and construct a clock which fitted in with the streetscape. The clock was to be a centerpiece within the town of Cobram Victoria.

Clockmasters came up with a design that changed the look of the clock from day to night. This was achieved with the use of LED lighting.

The frame of the clock is in stainless steel with aluminum dials.

The minute markers on the dials have back lighting within and in the center

behind the hands has concealed lights.

The lights work off a timer that switches them on at dusk and off at sunrise. The two slave movements are Swiss made long life movements. The system is controlled using an ETC 12 master clock with automatic daylight saving change over as well automatic reset to time after a power blackout. The whole system is protected with a UPS unit to ensure the power to the system is filtered preventing damage and costly repairs. ©

Mobatime New Analog clock Flex

The sturdy and elegant analog FLEX clock has a metal housing and are designed to impress. With their time reliability throughout the day you wouldn't want any thing less.

These versatile clocks cover all indoor applications – they are simple to use and flexible.

They are available with a range of sizes, movements, dials and hands as well as different mounting variants, and thus can be easily integrated into new and existing facilities.

The wall and ceiling set (Ø 25 – 40 cm) allows a very quick mounting – simply snap it on. The FLEX clock is also available with a stainless steel housing (V2A).

FLEX – the clock that leaves nothing to be desired. Interested to find out more or getting a price? Then contact us at Clockmasters Australia by email at clocks@clockmasters.com.au or phone Graham on 1300555099 where we can arrange to supply you with a brochure and quote on your needs.

We are working towards emailing a regular 2 monthly one page newsletter. This newsletter will feature the latest products and information within the industry. If you do not wish to receive this newsletter please email us at clocks@clockmasters.com.au with your email address, name and any other details and we will remove you from our email list.
