

Slave clocks

SLIM-metallic

The SLIM-metallic slave clocks consist of a thin beautifully shaped metal housing of top-quality powder-coated steel and are a decoration in any room.

The especially simple mounting using the wall

mounting ring for single-sided clocks or the wall bracket and ceiling pendulum for double-sided clocks completes the range.

The SLIM-metallic slave clocks meet the highest quality and aesthetic standards.

SLIM-metallic slave clocks

The SLIM-metallic clocks are available with the following movements :

A (h/m):

Minute pulse movement for operation as a standard minute pulse slave clock, 24 V.

E (h/m/s):

Second pulse movement for operation as a second pulse slave clock, 24V and 48V.

SAM (h/m):

MOBALine movement for operation as self-setting slave clock.

SEM (h/m/s):

Same as SAM but with MOBALine second movement.

SAN (h/m):

NTP movement for operation as self-setting slave clock, powered via PoE (Power over Ethernet), synchronised by an NTP Server (e. g. NMC) via Multicast packets.

SEN (h/m/s):

Same as SAN but with NTP second movement.

SAW (h/m):

From a centralized radio transmitter (WTD 868-T) wireless synchronized movement with battery. Battery life span > 3 years.

SEW (h/m/s):

Same as SAW but with second movement. Battery life span > 2 years.

-MPS:

Mains power option for SEW and SAW movements.

FWU (h/m/s):

DCF radio movement for autonomous operation. Battery life span > 3 years

DQ (h/m/s):

Battery quartz movement for autonomous operation. Battery life span > 3 years

Order example:

SLIM-M . SAM . 30 . 200

Clock type.movement.diameter.dial type

Type 200

Type 210

The SLIM-metallic slave clocks are available in 30 cm diameter. Two different dial variants are available.

Wall set, ceiling set and wall mounting ring are available as accessories. Two SLIM-metallic clocks can be mounted using the wall set by simple clicking in place as a double-sided clock. The flange is used for secured mounting to the wall. Two SLIM-metallic clocks can be made into a double-sided clock by simple clicking in place using the ceiling set. The ceiling pendulum (100 or 50 cms long, can be shortened by the client) is used to suspend the clock from the ceiling.

For housing, wall and ceiling sets, the standard color is white (RAL 9002). Other colors available on request.

Accessories	
Order reference	Description
SLIM-M.30.WM	Wall mounting ring
SLIM-M.30.WS	Wall set
SLIM-M.30.DS.50	Ceiling set, pendulum length 50cm
SLIM-M.30.DS.100	Ceiling set, pendulum length 100cm
