Tee off on time

When you are waiting to tee off or need to know how long you have on the practice green it is important to know the time. In the ATC this has been overcome with a large 3.2 metre dial installed on the wall of the club rooms. This clock can be seen clearly from the first green over a 100 metres away. The clock is fully automatic for daylight saving and resetting to time after a power blackout with the ETC master clock range.

Clockmasters used a high quality Swiss clock movement which offers long life and low running cost. The hands and minute markers are in aluminium. The markers are set off the wall to give a 3D effect. The clock will operate in temperatures between -5 to $+58$ c. For your outdoor clock please contact us for advice.

Daylight saving begins on October 8 / 2012
South Australia, Victoria & New South Wales
Your clock must go forward 1 hour on
Saturday night.

Don't over sleep

We are working towards emailing a regular 2 monthly one page newsletter. This newsletter will feature the latest products and information within the industry. If you do not wish to receive this newsletter please email us at clocks@clockmasters.com.au with your email address, name and any other details and we will remove you from our email list.

Visit the Clockmasters website today at www.clockmasters.com.au for more information.
