Adelaide Airport South Australia

Level 2 check -in
1.8 metre diameter dial

ClockMasters Australia was proud to be chosen to manufacture and install the new clock system at the recently opened Adelaide Airport.

The contract involved a total of 8 clocks, ranging from 400mm diameter up to 1.8 metre diameter. All the clocks are synchronized via a GPS internet signal.

The clock movements are self-setting with the signal transmitted through the Ethernet system at the Airport. This made them more cost effective, whilst delivering an accurate time keeping system.

The dials were kept simple and clean, enabling visibility for the visually impaired.

During the installation the airport was fully operational. ClockMasters took into consideration issues such as: public safety, security restrictions, protection of existing fittings & floor coverings and access for equipment..

The professionalism and many years of experience of ClockMasters ensured continual liaison with the airport management and security. During the installation all parties were kept up to date with the work program and any alterations. Work proceeded smoothly with minimal inconvenience to the running of the airport.

Level 2 food hall Adelaide airport
3 sided clock & 800mm diameter dials

Clockmasters will listen to your requirements and advise on the best solution .

Pictured on right, the Victorian Polo Club required a transportable scoreboard.

The timer was required to operate on the sporting field where power was unavailable.

The portable unit had to display the team scores and include a clock which could be set to count down.

ClockMasters came up with the solution of operating the system via an inverter and 12v batteries with a hand held remote controller. This allowed operation of the clock from over 50metres. Other features included lock-up storage bins and an easy transportable unit.

Solution for sporting clubs

The Timer Display

- Weather proof aluminium case
- Ultra-bright , wide viewing angle LED'S
- Hand held RF remote controller
- Viewing distance from 10-160 metres
- Team colour identification
- Score numbers

A chance to win

One of 3 bottles of

South Australian Wine
